

Rep. Crawford Amendment to H.R. 2740

Draft Language:

With respect to the project referred to as Bayou Meto Basin, Arkansas, the Corps of Engineers shall accept as in-kind work any component or feature of the project that the non-federal sponsor, or its partners, completes. If the Corps believes that a component or feature of the project should not be accepted as in-kind work, the agency shall seek a determination from the Committee before denying it. Any in-work completed with non-federal funds shall be subject only to those federal laws and regulations that would normally apply to work a State would conduct if the Corps were not involved.
