AMENDMENT TO
RULES COMMITTEE PRINT 115-39
OFFERED BY MR. POLIS OF COLORADO

At the end, add the following:

1 TITLE VI—SENSE OF CONGRESS REGARDING CARBON FEE

2 SEC. 6001. SENSE OF CONGRESS REGARDING CARBON FEE.

3 It is the sense of the Congress that:

4 (1) A carbon fee should be used as a funding mechanism for any tax reform legislation.

5 (2) Carbon price proposals have the potential to generate two trillion dollars over ten years.

6 (3) A carbon pricing mechanism that delivers maximum benefits to low and middle-income families, and complements sustained support for energy innovation, will allow for a more rapid and equitable transition to a clean energy economy. This is a critical step for our nation’s health, and to ensure a sustainable and strong energy and economic future.
