

**AMENDMENT TO H.R. 3638, AS REPORTED  
OFFERED BY MR. WALKINSHAW OF VIRGINIA**

Page 3, beginning on line 6, redesignate section 2 as section 3.

Page 3, after line 5, insert the following:

**1 SEC. 2. FINDINGS.**

2 Congress finds the following:

3 (1) Since the start of the Trump Administra-  
4 tion, approximately 158,816 energy jobs have been  
5 lost or delayed, as documented in recent national  
6 clean-energy sector assessments.

7 (2) At least 307 energy projects across 34  
8 States have been canceled, delayed, or otherwise dis-  
9 rupted, including projects affected by grant with-  
10 drawals, suspended development, or workforce reduc-  
11 tions.

12 (3) These disruptions represent an estimated  
13 \$52.48 billion in lost or delayed private and public  
14 investment in the solar, wind, battery, electric-vehi-  
15 cle, and advanced-energy manufacturing sectors.

16 (4) A total of 24,309 megawatts of planned en-  
17 ergy generation have been lost due to energy

1 projects canceled or delayed since the November  
2 2024 election, reducing anticipated renewable-gen-  
3 eration capacity nationwide.

4 (5) The energy generation capacity lost from  
5 these canceled or delayed projects—24,309  
6 megawatts—would have been sufficient to power  
7 more than 12 million homes in the United States,  
8 diminishing expected benefits for household energy  
9 reliability and affordability.

10 (6) Residential electric prices are now up 13  
11 percent since January 2025, and forecasts indicate  
12 continuing upward pressure on household energy  
13 costs.

14 (7) More than 80,000,000 Americans are cur-  
15 rently struggling to pay their utility bills.

16 (8) Public Law 119-21, better known as the  
17 Big Ugly Bill, will cause electricity prices to increase  
18 by 61 percent.

19 (9) That increase comes on top of the  
20 \$34,000,000,000 in rate hikes that electric utilities  
21 have requested just this year.

22 (10) In October 2025, Secretary of Energy  
23 Chris Wright canceled \$8 billion worth of grants to

- 1 over 300 energy projects that would have provided
- 2 low-cost, reliable energy to the American grid.
